

Introduction

A To-Do List is a useful tool for organizing chores, managing priorities, and increasing productivity. It's a vital companion for anyone looking for organization and efficiency in their everyday activities, with capabilities like adding, deleting, and editing tasks.

Features & Description

- **Header**: Showcasing a user's picture alongside the Todo List's name,
- **Zustand State Management**: Using Zustand, a state management library, allows for effective administration of application state, providing smooth data handling and changes across components.
- **CRUD Functions**: Core feature includes CRUD activities (Create, Read, Update, and Delete), which enable users to add, view, modify, and delete to-do items in a flexible and easy manner.
- **Footer**: Displays vital data such as the user's name, school ID, section code, course description, course name, and academic year
